

# DEMOLITION SERVICES

STRUCTURAL | INTERIOR | SELECTIVE | EMERGENCY

With an in-house fleet of heavy equipment and an experienced team scalable to the size and timeframe your project requires, EIS delivers turnkey solutions, self-performing all aspects of demolition. The EIS Family of Companies has a Class A Demolition License and an exceptional track record to prepare us for most challenges. Licensed in 34 states, our depth of expertise serves a vast range of industries, including commercial, retail, industrial, medical, government, and infrastructure.

## DEMOLITION SOLUTIONS

Our demolition teams utilize innovative and successful techniques in the areas of historic preservation, interior renovation, selective dismantling, and total demolition.

### Structural

Complex structural demolition is a comprehensive procedure of demolishing buildings or specific structures, including walls, roof systems, foundations, and footings. Our large fleet of company-owned heavy equipment, including high-reach excavators, allows us to address large structures that others cannot.

### Interior

Interior demolition projects are performed with stringent debris controls and the concern for limiting vibration, noise, and dust. We are experienced with working in occupied buildings and confined spaces.

### Selective

Selective demolition requires a high degree of preparation and precision to ensure proper removal of material during the demolition process. Our highly experienced demolition teams consider every detail, from utilities, to potentially hazardous materials, to historic preservation.

### Emergency

Our teams are experienced in providing fast yet safe emergency demolition of buildings affected by natural disasters, fires, or failing structures to quickly eliminate potential dangers.

# WE KEEP OUR CUSTOMERS MOVING FORWARD WITH TURNKEY SERVICES UNDER ONE ROOF.

Prior to demolition, we thoroughly inspect and survey the project site. With our comprehensive portfolio of environmental solutions that complement our demolition services, we have the unique ability to handle a multitude of project challenges.

- Asbestos Abatement
- Lead Abatement
- Utility Removal
- Equipment Dismantling
- Asset Recovery & Recycling
- Historic Preservation
- Scaffolding & Shoring
- Dust Control Containments
- Soil Remediation
- Water Remediation
- LEED Tracking
- Jobsite Security

## WHY CHOOSE EIS:

### Exceptional Safety Record

We hold exceptional EMRs and records with trusted third-party risk management firms, a standard that we continually focus on for the overall safety of our teams.

### Unrivaled Bonding Capacity

Our unrivaled bonding capacity and excellent safety record ensure the highest qualified company on both small and large-scale environmental projects.

### Reliable and Sizeable Manpower

With over 1,000 team members nationwide, we have the unique ability to staff multi-phased, complex projects without delay.

### National Reach

We hold specialty licenses in 34 states that work to provide turnkey services to our customers nationwide.

### Decades of Experience

For over 40 years, we have been expanding, building, and perfecting an environmental services platform that exceeds all others.

### Outstanding Customer Service

Our team provides next-level customer service every day. We focus on safety, clear communication, and a proactive work environment to keep your project on time and on budget.
