

REGULATORY COMPLIANCE

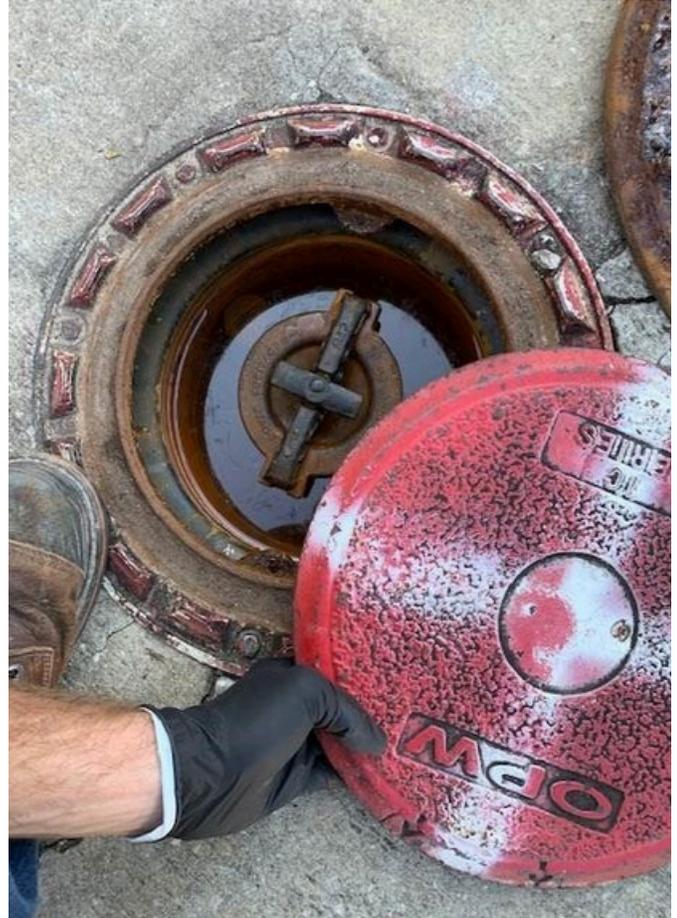

CONSULTING | MANAGEMENT | ASSESSMENT | SUPPORT

With extensive expertise spanning all facets of storage tank systems, the EIS team comprises some of the most seasoned compliance managers and field inspectors in the industry. Our trained professionals conduct thorough inspections of above and underground storage tank (AST/UST) systems to identify compliance gaps related to maintaining up-to-date equipment, operational leak detection systems, accurate reconciliation records, and proper handling of new discharges.

WE HANDLE EVERY DETAIL
WITH EXPERIENCE YOU CAN COUNT ON.

EIS specializes in early detection, diagnosis, and remediation of fuel quality issues, UST/AST maintenance, and regulatory concerns. Leveraging our established rapport with state and county storage tank inspectors—along with our advanced electronic management of compliance and testing records—we ensure strict adherence to state and federal regulations.
